#### **Advancing the Engines of Industrial Innovation**

Silicon Century Capital is a U.S.-based independent sponsor investing across the semiconductor and advanced manufacturing value chain.

We focus on the technologies and platforms that form the foundation of the modern industrial economy — **semiconductors, robotics, AI, and intelligent manufacturing systems** — where production and technology intersect.

Our mission is to accelerate the reshoring of critical technologies, strengthen industrial resilience, and **unlock value through corporate carve-outs and strategic partnerships** with management teams and global investors — advancing the industrial backbone of the future.

#### **Investing Across the Connected Industrial Ecosystem**

We invest in four interconnected sectors that together define the New Industrial Core — the technologies driving productivity, intelligence, and resilience for the century ahead.

##### **Semiconductors**

Chip design, advanced packaging, and integration — the foundation of digital infrastructure and computational performance.

*Hover insight: Semiconductors are experiencing record capacity expansion and reshoring*, driven by national incentives and sustained demand for advanced chips.

##### **Advanced Manufacturing**

Platforms, materials, and production systems enabling reshoring, precision fabrication, and supply chain resilience.

*Hover insight: Manufacturing investment is accelerating in the U.S. and allied markets*, as automation and digitization redefine productivity and competitive scale.

##### **Robotics & Automation**

Intelligent machines, motion systems, and process control technologies that elevate industrial precision and efficiency.

*Hover insight: Global robotics adoption is compounding annually*, bridging workforce gaps and improving operational performance across sectors.

##### **AI & Intelligent Systems**

Artificial intelligence, software, and control platforms powering smart manufacturing and connected industrial operations.

*Hover insight: AI-driven systems are transforming factory intelligence*, optimizing design, production, and real-time decision-making.

#### **Experience, Insight, and Industrial Depth**

Our team combines decades of experience as operators, engineers, and investors across semiconductors, automation, and software-driven manufacturing.

We have led technology, software, semiconductor, and industrial companies through complex carve-outs, restructurings, and periods of rapid transformation — **unlocking value through financial discipline, operational excellence, and strategic execution**.

We partner with **family offices, corporates, institutional investors, and sovereign wealth funds** to identify and transform companies positioned at the intersection of innovation and scale.

We understand that industrial performance today depends as much on **code as on capital** — integrating AI, automation, and advanced production to build enduring competitiveness.

#### **Trusted Experience Across the Global Industrial Ecosystem**

Our network includes executives, engineers, and investors with deep roots in the world's leading technology and manufacturing companies.

We collaborate with global partners to advance U.S. industrial capability, strengthen critical supply chains, and secure the infrastructure of innovation.

#### **Commitment Beyond Capital**

A portion of Silicon Century Capital's profits support organizations that reflect our values — service, craftsmanship, and national renewal.

We proudly contribute to:

- **Tunnel to Towers Foundation**, which honors and supports veterans and first responders and their families.
- **mikeroweWORKS Foundation**, which helps close the skills gap by funding scholarships and celebrating the dignity of skilled trades.

These causes reflect the same principles that guide our work — discipline, purpose, and a belief in the value of building things that last.

### **Ready to Build the Next Century of Industry?**

#### **Our Perspective**

Silicon Century Capital was founded with a simple premise: the future of competitiveness depends on control of the **industrial technologies** that make innovation possible.

As a U.S.-based independent sponsor, we invest in **semiconductors, robotics, AI, and advanced manufacturing platforms** — the interconnected systems that form the *New Industrial Core*.

We see opportunity where technology, production, and national capability converge.

**Our role is to bridge capital and industry — backing proven companies, partnering with management teams, and driving performance in the sectors that define the global economy. We bring best practices in strategy, operations, and governance to ensure successful migration, growth, and capability building across every stage of transformation.**

#### **Our Investment Philosophy**

We invest in complex, high-impact situations where our combination of **financial discipline, operational experience, and strategic insight** creates lasting value.

#### **Core Principles**

- **Industrial Focus** — Concentrated expertise across semiconductors, manufacturing, and automation.
- **Operational Partnership** — Hands-on engagement with management to improve execution, technology adoption, and scale.
- **Strategic Capital** — Global investor relationships that unlock alignment and long-term growth.
- **Resilience & Competitiveness** — Building businesses that strengthen industrial capability and independence.

Our approach blends **institutional rigor** with the flexibility of an independent sponsor — allowing us to pursue opportunities traditional private-equity funds often overlook.

#### **Where We Invest**

We target opportunities across the **semiconductor and advanced manufacturing value chain**, including:

- **Corporate Carve-Outs** — Unlocking value in non-core divisions or business units ready for independent growth.
- **Complex Buyouts** — Partnering with management in under-capitalized or transitional situations.
- **Growth Investments** — Providing expansion capital to accelerate industrial and technological platforms.
- **Special Situations** — Flexible capital solutions for operationally sound businesses requiring structural change.

We focus on companies with strong fundamentals, strategic relevance, and the potential to lead within the New Industrial Core.

### **How We Create Value**

We approach every investment with a dual lens — **financial precision and operational excellence**.

Our team has led organizations through **restructurings, carve-outs, and rapid transformation** in technology, software, semiconductor, and industrial sectors.

We bring the experience to reposition complex businesses and the discipline to drive measurable performance. Our value-creation model emphasizes:

- **Strategic Focus:** Clarifying purpose and market positioning.
- **Operational Efficiency:** Strengthening systems, talent, and execution.
- **Technology Leverage:** Applying automation and data intelligence to unlock productivity.
- **Capital Discipline:** Prioritizing sustainable growth and return on invested capital.

### **Global Partnerships**

We partner with **family offices, corporates, institutional investors, and sovereign wealth funds** that share our long-term view of industrial progress and resilience.

These partnerships provide more than capital — they bring global perspective, supply-chain access, and alignment around industrial competitiveness.

Together, we advance strategic investment in the technologies and capabilities that define the next century of industry.

### **Our Mission**

To build enduring value in the **industrial technologies that matter most** — creating stronger companies, resilient supply chains, and a more competitive economy.

We invest with purpose, operate with discipline, and partner with leaders who share our commitment to building what lasts.

### **Hero**

### **Investing Across the New Industrial Core**

We focus on the technologies and platforms that form the foundation of the modern industrial economy — from chip design and automation to AI and advanced manufacturing systems.

### **Buttons:**

Explore Our Sectors • Learn About Our Strategy

### **Introduction**

The world's industrial backbone is being rebuilt on a new foundation of **technology, intelligence, and scale**.

Silicon Century Capital invests in **semiconductors, advanced manufacturing, robotics, and intelligent systems** — four interconnected domains that power the modern economy.

We focus on proven platforms and emerging capabilities that enhance **industrial competitiveness, resilience, and national capability**.

Each of these sectors is undergoing structural transformation — shaped by technological change, capital realignment, and the reshoring of critical capacity.

Our role is to bring disciplined capital and operational insight to accelerate growth and build enduring value across this ecosystem.

### **Our Four Core Sectors**

#### **1. Semiconductors**

Semiconductors are the essential infrastructure of the digital age — enabling every layer of modern technology, from defense and data centers to AI and automation.

We invest across the **semiconductor value chain**, targeting companies that advance design, integration, and manufacturing capability.

##### **Focus Areas:**

- Fabless design and chip IP development
- Advanced packaging, OSAT, and test
- Module and system integration
- Supply chain and distribution infrastructure

##### **Our View:**

The next decade will redefine semiconductor geography and control.

We see opportunity in **reshoring, supply-chain diversification, and vertical integration** as critical technologies move closer to their end markets.

##### **SCC Value Add:**

We bring operational and financial expertise to carve-outs, capacity expansions, and growth investments that strengthen U.S. and allied semiconductor ecosystems.

#### **2. Advanced Manufacturing**

Advanced manufacturing is where innovation meets production — the domain where physical products, data, and automation converge.

We target **industrial platforms and technologies** that enable precision fabrication, smart materials, and sustainable, efficient production systems.

##### **Focus Areas:**

- Factory automation and process systems
- Precision machining and materials technology
- Industrial sensors and control systems
- Manufacturing software and analytics platforms

##### **Our View:**

The global manufacturing landscape is transforming through digitization, automation, and reshoring.

Competitive advantage will come from **connected systems, supply-chain transparency, and adaptive manufacturing processes**.

##### **SCC Value Add:**

We help companies scale through operational excellence, strategic repositioning, and targeted capital investment that supports modernization and market expansion.

#### **3. Robotics & Automation**

Robotics and automation are redefining productivity across industrial sectors.

From motion control to autonomous systems, these technologies represent the **link between digital intelligence and physical execution**.

##### **Focus Areas:**

- Industrial robotics and motion control systems
- Sensors, vision, and actuation technologies
- Robotics software and integration platforms
- Autonomous and collaborative systems

**Our View:**

Global automation adoption is accelerating across manufacturing, logistics, and infrastructure.

Labor dynamics, precision demands, and data-driven operations are fueling long-term growth.

**SCC Value Add:**

We partner with robotics and automation companies to strengthen operations, expand global reach, and develop new vertical applications — bringing both capital and industrial know-how to drive scale and efficiency.

**4. AI & Intelligent Systems**

Artificial intelligence is transforming how industrial systems operate, optimize, and learn.

We invest in **AI-driven software, analytics, and control platforms** that make factories, supply chains, and production systems smarter and more resilient.

**Focus Areas:**

- Industrial AI and data analytics software
- Edge and embedded intelligence
- Predictive maintenance and digital twin systems
- Control and optimization platforms

**Our View:**

The convergence of AI and industry marks the next evolution in manufacturing competitiveness.

Intelligence is no longer an overlay — it's a core input.

**SCC Value Add:**

We support the integration of AI into established industrial businesses, helping portfolio companies **modernize workflows, leverage data assets, and drive intelligent growth.**

**Integrated Ecosystem Approach**

These four sectors are **mutually reinforcing** — advances in one create opportunities in another.

Semiconductors enable AI; AI powers automation; automation drives manufacturing efficiency.

Our approach is intentionally cross-sectoral, allowing us to identify and capture value at the intersections of these systems — where capital, innovation, and production converge.

**Investment Characteristics**

We target businesses that exhibit:

- Proven technology or platform relevance in industrial value chains
- Strong underlying cash flow potential or asset base
- Complexity that benefits from active ownership and operational focus
- Strategic alignment with reshoring, defense, and critical infrastructure themes

Transaction types include **corporate carve-outs, control buyouts, growth capital investments, and special situations** requiring structural or strategic realignment.

**The Silicon Century Capital Advantage**

We operate with the **discipline of private equity** and the **hands-on capability of operators**.

Our team has led transformations in technology, software, semiconductor, and manufacturing environments — bringing best practices in **strategy, operations, and governance** to every company we back.

Our objective is consistent:

to strengthen industrial competitiveness, enhance capability, and create enduring value in the businesses that build the future.

Founder & Managing Partner – George Stelling

George Stelling, Managing Partner

George Stelling — Founder & Managing Partner

George Stelling is the Founder and Managing Partner of Silicon Century Capital, a U.S.-based independent sponsor investing across semiconductors, robotics, AI, and advanced manufacturing.

A senior executive and investor with more than three decades of experience, George has built and led companies at the intersection of technology, manufacturing, and private equity. His career spans the full private equity lifecycle — from sourcing, structuring, and due diligence through closing, integration, and value creation.

Before founding Silicon Century Capital, George served as Chief Executive Officer of Quadrillion Partners, a transformation and strategy firm that partners with leading private equity sponsors and portfolio companies.

Quadrillion's clients have included TPG Capital, Apollo, Oaktree Capital, CVC Capital Partners, VCP, and other global investors in sectors such as technology, manufacturing, energy, and industrials. Under his leadership, Quadrillion has delivered more than \$400 million in EBITDA improvement through operational and digital transformation programs.

Earlier in his career, George co-founded Prophet Equity, where he served as General Partner and Operating Partner, raising and deploying private equity capital to acquire and transform underperforming companies following the 2008 financial crisis.

George also serves on the Board of Resolve Tech Solutions, a Presidio Investors portfolio company specializing in AI, cloud, and digital transformation services for Fortune 500 and federal clients. His prior executive experience includes senior leadership roles at NVIDIA, ON Semiconductor, and The Franklin Mint, following an early career in management consulting at Bain & Company and PwC.

Across his career, George has built a reputation for driving operational excellence, financial discipline, and technology-enabled growth across complex global environments. His work has spanned semiconductors, AI, software, industrial systems, and manufacturing modernization across North America, EMEA, and APAC.

George's professional path began in semiconductor and steel trade policy, when he served in the White House / Office of the U.S. Trade Representative during the Reagan Administration while completing his undergraduate studies at Cornell University. That experience shaped his enduring focus on advancing U.S. competitiveness and technological leadership.

George holds an MBA from the Tuck School of Business at Dartmouth, an executive certificate in Artificial Intelligence from MIT Sloan, and a BA magna cum laude in Government from Cornell University.

George founded Silicon Century Capital to apply this experience toward a clear mission: to invest with purpose, improve performance, and build the next generation of industrial leaders.

#### Operating Advisors and Network

Silicon Century Capital operates through a network of senior operators, technologists, and industry experts who support diligence, strategy, and value-creation initiatives.

This collaborative model allows SCC to draw on deep domain expertise while maintaining focus and execution speed.

Our advisory network includes professionals with backgrounds in:

Semiconductor design, packaging, and manufacturing

Industrial automation and robotics integration

Software, AI, and intelligent systems

Supply-chain management and manufacturing operations

National and economic security policy

These relationships expand SCC's reach and perspective — connecting capital, capability, and leadership across the global industrial ecosystem.

#### Our Philosophy

We believe leadership is a function of stewardship and execution.

SCC approaches every investment with the mindset of an operator, combining financial discipline and industrial know-how to unlock performance and growth.

We measure success not by assets under management, but by the capability we build and the companies we strengthen.

Join Our Team

Selective by Design

Silicon Century Capital is expanding selectively from our base in Texas, seeking professionals who share our mission of strengthening the industrial backbone of the modern economy.

We look for individuals with backgrounds in operations, engineering, finance, and investment, who bring both analytical rigor and a builder's mindset.

If you are driven by operational excellence, industrial transformation, and long-term value creation — we'd like to hear from you.

## **Silicon Century Capital — Partners Page (Final Copy)**

**Hero**

### **Strategic Partnerships for Industrial Progress**

We collaborate with family offices, corporates, institutional investors, sovereign wealth funds, and U.S. public-sector stakeholders that share our long-term view of industrial progress and resilience.

**Buttons:**

[Connect With Us](#) • [Learn More About Our Strategy](#)

### **Introduction**

At Silicon Century Capital, partnership is fundamental to how we invest.

Our model is built on alignment — between capital providers, management teams, and strategic stakeholders — all working to strengthen the **industrial technologies that power the global economy**.

We bring together institutional capital and operational expertise to create impact where it matters most: in the physical systems that drive innovation, productivity, and national competitiveness.

### **Our Investment Partners**

We work alongside a select network of investors who share our conviction in **semiconductors, robotics, AI, and advanced manufacturing**.

Each partner contributes unique perspective and capability — from long-term family capital to global institutional experience and public-sector alignment.

#### **Partner Network (Four-Block Grid)**

##### **1. Family Offices**

Multi-generational capital aligned with long-term industrial growth and enduring value creation.

Family office partners bring patient capital, flexibility, and deep alignment with SCC's investment philosophy.

##### **2. Corporates**

Strategic industrial and technology corporations co-invest with SCC to access innovation, strengthen supply chains, and identify future platform opportunities.

These partnerships bridge financial investment with strategic collaboration.

##### **3. Institutional Investors & Sovereign Wealth Funds**

Leading institutional investors and sovereign entities seeking durable exposure to **industrial transformation, reshoring, and critical technology** collaborate with SCC to deploy capital into strategic industrial assets.

##### **4. U.S. Public-Sector Stakeholders**

SCC engages with U.S. public-sector stakeholders and aligned initiatives that promote **domestic capability, technology independence, and supply-chain resilience**.

These collaborations ensure that private capital and industrial policy work in concert to strengthen national competitiveness.

### **Our Partnership Philosophy**

We believe the best partnerships are built on **trust, transparency, and shared purpose**.

Every SCC relationship begins with alignment — of vision, time horizon, and values.

Our approach to partnership includes:

- **Strategic Alignment:** Shared understanding of industrial priorities and investment themes.
- **Collaborative Execution:** Joint diligence and structured co-investment frameworks.
- **Long-Term Engagement:** Active communication and sustained value creation post-investment.

Our partners don't just invest in companies — they invest in **capability, infrastructure, and the future of industrial innovation**.

### **Global Perspective, U.S. Focus**

While Silicon Century Capital is headquartered in the United States, our partnerships and perspective are global.

We engage with investors, corporates, and institutions across allied markets including **Europe, Japan, South Korea, and Taiwan** — geographies that anchor the global semiconductor and manufacturing ecosystem.

Together, these relationships create a network capable of **mobilizing capital, technology, and expertise** to advance industrial progress and competitiveness.

### **Why Partner with SCC**

#### **Alignment with Mission and Markets**

SCC provides access to the **New Industrial Core** — an ecosystem of technologies driving structural change across global industries.

#### **Proven Expertise in Complex Situations**

Our team has led carve-outs, restructurings, and transformational growth efforts — creating value through financial precision and operational excellence.

#### **Hands-On Partnership**

We engage directly with management teams and investors, ensuring collaboration from diligence through value creation.

#### **Strategic Connectivity**

Our relationships span industry operators, policymakers, and investors — allowing us to bridge insight and execution across capital and capability.

#### **Join Our Investor Network**

We selectively expand our partnerships with investors, corporates, and strategic allies that share our purpose: **to strengthen industrial capability and competitiveness through disciplined investment and operational excellence**.

#### **Buttons:**

### **Hero**

#### **Building Enduring Industrial Value**

Our portfolio reflects a disciplined approach to investing — focused on companies that advance industrial capability, technology leadership, and resilience.

### **Introduction**

At Silicon Century Capital, we invest selectively and with purpose.

Our portfolio is being constructed around **proven and emerging industrial technologies** that form the backbone of the modern economy — semiconductors, robotics, AI, and advanced manufacturing.

Each investment is grounded in our commitment to operational excellence, strategic partnership, and measurable value creation.

We are currently advancing a **strong pipeline of opportunities** aligned with our sector themes and strategic investor partnerships.

### **Our Approach to Building the Portfolio**

Our strategy is focused on quality, not volume.

We invest in companies that demonstrate the following characteristics:

- **Strategic Relevance** — Businesses positioned within critical industrial or technological value chains.
- **Operational Potential** — Opportunities to improve systems, execution, and scalability.
- **Structural Complexity** — Situations where SCC's carve-out, restructuring, and integration expertise can unlock hidden value.
- **Long-Term Competitiveness** — Platforms capable of driving sustained growth and industrial impact.

We combine **financial precision** with **operational capability** to strengthen and grow these businesses over time.

### **Our Investment Process**

- **Thesis-Driven Sourcing** — We identify opportunities through our deep network across semiconductors, manufacturing, and automation.
- **Strategic Assessment** — Every potential investment is analyzed for industrial significance, capability alignment, and growth potential.
- **Operational Partnership** — We work closely with management teams from diligence through execution to establish long-term value plans.
- **Measured Growth** — Our focus is on building competitive advantage and resilience, not short-term financial engineering.

### **Representative Themes**

While we do not publicly disclose portfolio companies until transactions close, our current investment pipeline includes opportunities within:

- **Semiconductor Packaging and Test** — Advanced packaging and integration platforms supporting next-generation chip design.
- **Automation & Robotics** — Hardware and control systems improving industrial productivity and labor efficiency.

- **AI-Driven Manufacturing Software** — Intelligent tools enabling design, monitoring, and predictive performance in industrial environments.
- **Reshoring & Supply Chain Infrastructure** — U.S.-based manufacturing and logistics platforms enhancing capacity and resilience.

### **Our Objective**

Our goal is not to own many companies — but to build exceptional ones.

Each SCC investment is a partnership focused on **value creation, capability development, and long-term industrial competitiveness.**

We invest to strengthen the systems that make innovation possible.

### **Future Portfolio Announcements**

As transactions are completed and integrations mature, SCC will announce portfolio companies that exemplify our mission and strategy.

All disclosures will align with our confidentiality standards and partner agreements.

To receive future portfolio updates or announcements, please **join our network.**

### **Buttons:**

[Join Our Network](#) • [Contact Us](#)

##### **Use of Content**

All text, graphics, logos, and other materials on this site are the property of Silicon Century Capital or its affiliates and are protected by applicable copyright, trademark, and intellectual-property laws.

You may not copy, distribute, modify, or republish any content without SCC's prior written consent.

##### **No Warranty**

The information on this site is provided "as is" without warranties of any kind, express or implied, including but not limited to accuracy, timeliness, or fitness for a particular purpose.

##### **Limitation of Liability**

Under no circumstances shall Silicon Century Capital, its affiliates, or representatives be liable for any direct or indirect damages arising from your use of, or inability to use, this site.

##### **Governing Law**

These Terms are governed by and construed in accordance with the laws of the State of Texas, without regard to conflict-of-law principles.

#### **3. Privacy Policy**

##### **Information We Collect**

Silicon Century Capital may collect limited personal information that you voluntarily provide through our contact or subscription forms — such as your name, company, email address, and message.

We may also collect non-personal information automatically (such as browser type, device, and analytics data) to improve site performance.

##### **Use of Information**

We use the information you provide solely to respond to inquiries, manage communications, or deliver insights and

updates you request.

SCC does not sell, rent, or trade your personal information to any third parties.

#### **Cookies and Analytics**

This site may use cookies and analytics tools (e.g., Google Analytics) to gather anonymous data about site usage. You can adjust your browser settings to manage or block cookies at any time.

#### **Data Security**

We implement reasonable administrative, technical, and physical safeguards to protect the information you provide against unauthorized access, disclosure, or misuse.

#### **Third-Party Links**

This website may contain links to external sites. SCC is not responsible for the content or privacy practices of those sites.

#### **Updates to this Policy**

We may update this Privacy Policy periodically. Any changes will be reflected with a revised effective date.

#### **Contact Us**

For all privacy, accessibility, and general inquiries, please contact:

 [ContactUs@siliconcenturycapital.com](mailto:ContactUs@siliconcenturycapital.com)

#### **4. Accessibility Statement**

Silicon Century Capital is committed to providing an accessible online experience for all visitors.

If you encounter any accessibility issues, please contact [ContactUs@siliconcenturycapital.com](mailto:ContactUs@siliconcenturycapital.com), and we will make reasonable efforts to improve usability.

Silicon Century Capital | Legal Disclosure and Privacy Policy

#### **Meta Description:**

View Silicon Century Capital's Legal Disclosure, Terms of Use, and Privacy Policy. The firm operates as a private investment entity focused on industrial technologies and may sponsor private investment vehicles for accredited investors in the future.

#### **Silicon Century Capital — Careers Page (Final Copy)**

##### **Hero**

##### **Selective by Design**

We're building a team that combines strategic capital, operational depth, and a shared commitment to strengthening the industrial backbone of the modern economy.

##### **Introduction**

At Silicon Century Capital, we hire with intention.

We are growing selectively — adding exceptional individuals who share our mission to **advance U.S. and allied industrial capability through disciplined investment and operational excellence**.

Our work sits at the intersection of **technology, manufacturing, and capital**.

We look for people who thrive in complex environments, think strategically, and execute with precision.

##### **Our Culture**

We operate with the same discipline and long-term perspective we expect of the companies we invest in.

Our culture is defined by five principles:

- **Integrity:** We do the right thing — always, and especially when it's hard.
- **Discipline:** We approach every investment and every decision with rigor.
- **Collaboration:** We believe the best results come from partnership — internally and externally.
- **Respect for Builders:** We honor engineers, operators, and craftspeople as the foundation of progress.
- **Purpose:** We invest in what strengthens economies, industries, and communities.

We believe in stewardship — of capital, of capability, and of culture.

##### **Open Roles**

Silicon Century Capital is headquartered in the **Dallas–Fort Worth Metroplex, Texas**, and is **hiring selectively** for roles in operations, analysis, and value creation.

If you bring experience in **semiconductors, manufacturing, private equity, or operational transformation**, we encourage you to reach out.

We're always interested in connecting with:

- **Investment professionals** with backgrounds in private equity, M&A, or corporate development.
- **Operators and engineers** have experienced industrial systems, manufacturing, lean, or technology new product introduction (NPI) or implementation.
- **Advisors and industry experts** who align with our mission and sector focus.

### **How to Apply**

We hire thoughtfully and confidentially.

If you are interested in exploring current or future opportunities, please send your résumé and a brief introduction to:

[✉ ContactUs@siliconcenturycapital.com](mailto:ContactUs@siliconcenturycapital.com)

Please include your location, relevant experience, and area of focus.

All inquiries are reviewed in confidence.

### **Advisors and Collaborators**

Beyond direct hires, SCC partners with **operating executives, senior engineers, and strategic advisors** who support our diligence and value-creation efforts.

If you are an experienced operator or technical expert seeking to collaborate on a project or engagement basis, we welcome introductions.

[✉ ContactUs@siliconcenturycapital.com](mailto:ContactUs@siliconcenturycapital.com)

### **Equal Opportunity Statement**

Silicon Century Capital provides equal employment opportunities to all employees and applicants without regard to race, color, religion, gender, sexual orientation, gender identity, national origin, age, disability, or veteran status.

We are committed to fostering an inclusive environment where excellence and integrity guide every decision.
